

India's national challenge in Infection Prevention and Surgical Safety.

Healthcare Sector Skill Council (HSSC), in collaboration with 3M India, brings together hospitals and healthcare teams across the country to test what matters most in patient safety: knowledge, precision, and sharp decision-making.

One Path. Four Stages.

District → State → Regional → National Championship

Win each round to move closer to the title. The first three stages will be held online, and the best teams meet face to face at the National Championship.

Who Can Enter?

-  Hospitals and healthcare organisations can nominate teams
-  Each organisation can participate with a team of 3 participants.

Knowing Is Not Enough

The real test is how well you apply what you know.

Bring your team together. Start at the District level. See how far your knowledge can take you.

Registrations are open.

 **Register Your Team -** <https://apex2026.healthcare-eskilling.com:8443/>

Don't Miss Out. Register by 31 October 2026
