Healthcare Sector Skill Council | Forvis Mazars | phfi PUBLIC HEALTH FOUNDATION OF INDIA

Skill Gap Assessment Study of the Healthcare Sector

Supporting a stronger, future-ready health workforce for India

About the Study

The Healthcare Sector Skill Council (HSSC) is conducting a comprehensive Skill Gap Assessment Study to assess current and emerging skill requirements across **clinical and allied health services, AYUSH, digital health, the care economy, and medical devices.**

Objectives

The study will assess policy frameworks, workforce demand and supply gaps, training capacity, course relevance, certification systems, and implementation challenges to identify region-specific skill gaps. The findings will inform strategic recommendations for strengthening the health workforce and guiding long-term investments in human resources for health.

Study Partners

HSSC has engaged **Forvis Mazars LLP**, in collaboration with the **Public Health Foundation of India (PHFI)**, to conduct this study across various states.

We Need Your Support

As part of the study, we are collecting information from hospitals and other health facilities, laboratories, and ambulance service providers. Please complete the relevant questionnaire using the links below.

Health Facility Survey

https://ee.kobotoolbox.org/x/TYEimous

Laboratory Services Survey

https://ee.kobotoolbox.org/x/qn2eQNEb

Ambulance Services Survey

https://ee.kobotoolbox.org/x/ylAA0Me4

Please submit your responses by

15 November, 2026

Kindly circulate these links among relevant hospitals, laboratories, and ambulance service providers and encourage them to participate in the study.

Your Support Matters

Your support will help ensure broad representation across the healthcare sector and inform evidence-based recommendations for strengthening India's health workforce planning and development.

Together for a healthier, skilled and more resilient healthcare workforce in India
